Sympathetic Vibratory Physics

The Science, History, Philosophy, Theory and Application of Sound & Vibration

Humanity has reached its jumping off place where the material focus on life gives way to the High Spiritual.

Quantum Sciences is finally recognizing the powers of the Mind and Consciousness and joining these with what we have been calling "religion" or metaphysics and with machinery and other benefits for our living conditions and systems.

This catalog offers numerous books and pamphlets that bear on these advanced discoveries whose roots go back to the 1800s and early 1900s.

To the right: The Musical Dynasphere (Atlin) under research and development. Your book and video purchases supports this and other projects!!

*"The **sympathetic vibratory** force discovered by Keely will be quite sufficient to make him the greatest discoverer of this age."*

H. P. Blavatsky, *The Secret Doctrine*, 1888

*"Mr. Keely has demonstrated he has discovered a **vibratory force** previously unknown to science... which, when applied to machinery, must superseded all ordinary appliances."*

Professor Joseph Leidy, MD, 1890

*"Having witnessed Keely's experiments in **sympathetic vibration**, I am satisfied he has made new and important demonstrations of natural forces not explained by known physical laws."*

Dr. James M. Wilcox, PhD, 1890

*"The science of the future will be based on **Sympathetic Vibrations**."*

Rudolph Steiner, 1913

.."if Keely were to die tomorrow, it might be a hundred years before another mind would arise able to complete his work;"

A Dialogue on Awakening - Communion with a Loving Brother

Carpenter, Tom & Linda

While there are many degrees to the illusion of separation, sometimes described as dimensions, there is only a single state of being aware or Awakened to the full expression of Creation. This is the state of Christ-Consciousness, or whole Mind, or the Oneness of all Creation. It is the state of our Being which has never changed, but seems lost from memory in our temporary focus on the illusion of separation from God. Because that is our natural state, there is nothing to earn, to learn, or do to return to it. As we remember who we truly are, we "awaken" as if from a dream; all that we experienced here in this realm of polarities, seemingly apart from the harmony of Creation, has had no effect whatsoever on our own perfection as God created us. It is in the experience of remembering who we truly are that Jesus began teaching us two thousand years ago, and continues in these dialogues today. This work has its roots in "A Course in Miracles" authored by Jesus (Esu Immanuel Sananda) through Helen Schucman.

"This is the best book I have ever read that can actually take one to the very edge of remembering - if not completely through it." Dale Pond. updated and improved 2nd edition.

"How can I ever communicate my gratitude for recommending *Dialogue on Awakening*? You have been truly the hand of god in action. I know my searching is over. **I AM AWAKE!** Oceans of love is being directed to you." Your friend eternally T.L.

A New Concept of the Universe

Russell, Walter

"The Russell Cosmogony with its new concepts of light, matter, energy, electricity and magnetism is a simple yet complete, consistent and workable cosmogony which will enable future scientists to visualize the universe as a unified whole, and will open the door to the New Age of Transmutation." — Walter Russell, " 173 pages 6" x 9"

A Primer of Rotational Physics

Myrna M. Milani & Brian R. Smith

A Primer of Rotational Physics is the first book of a series which presents a new theory of science, one based on rotational mechanics. The objective of the complete series is to establish an integrated Unified Fields Theory, encompassing science, engineering, philosophy, medicine and all human experience. *Primer* introduces the concept of the smallest entity in our universe and describes how it acts and interacts to produce what we know as our basic energy forms.

ABC of Musical Theory

Dunstan, Ralph

Reprint of the original circa 1920. Pamphlet is intended to provide a series of graduated questions and exercises covering, as far as possible, the whole field of what is commonly known as Musical Theory or the Rudiments of Music. Illustrated. Covers: Notes, rests, time signatures, scales, terms, etc. 8.5" X 11"

Abrams' Methods of Diagnosis & Treatment

Barr, Sir James

Reprint of the original 1925 edition. Very good book. Covers: Criticisms of his devices and techniques, diagnosis and treatments of tuberculosis, cancer, goiter, colitis, high blood pressure, ulcers and dozens of lesser illnesses. Scientific review of the electrical properties of the oscilloclast. Contains schematic for building a working unit. 8.5" x 11"

Acoustic Lens is Gas-Filled

Kendall, Jr., J. M.

A novel acoustic lens is fabricated by clamping together two membranes of thin plastic and filling the enclosed space with a fluoro-carbon gas. In tests, the lens substantially improved the accuracy of sound "maps" of turbulent airflow. It could be used to record sound-intensity patterns in the design of speakers, lecture halls, and auditoriums. NASA Tech Brief. 8.5" x 11"

Acoustic Levitation Methods and Apparatus

NASA

Levitation has been achieved by applying a frequency along each of the three chamber dimensions which produces a wavelength equal to twice the corresponding chamber dimension, or by applying a frequency which is an integral multiple thereof. The present paper provides for levitating objects within chambers having curved walls. NASA Tech Brief. 8.5" X 11"

Pamphlet N0021488 \$2.95

Acoustic Levitation System

NASA

Dense materials, such as steel balls, can be continuously levitated with the energy provided by an efficient high-powered siren in combination with a shaped reflector. The motor-driven variable-frequency siren has its acoustical impedance matched to the impedance of the air in the levitation chamber by an exponential horn. NASA Tech Brief. 8.5" X 11"

Pamphlet N0010488 \$1.60

Acoustic Levitation with Less Equipment

NASA

Certain chamber shapes require fewer than three acoustic drivers. Most previous work on acoustic levitation has dealt with rectangular chambers. Three drivers excite the chamber along three orthogonal axes - x, y, and z. The three drivers must be used simultaneously to position an object at the center of the chamber, where they create a point of minimum acoustic potential. NASA Tech Brief. 8.5" X 11"

Pamphlet N0015488 \$4.95

Acoustic Levitation with One Driver

NASA

A brief report discusses acoustic levitation in a rectangular chamber using one driver mounted at a corner. The single driver excites vibrations along all three axes. The excitation scheme is an elaboration of concepts expressed in Acoustic Levitation with Less Equipment. NASA Tech Brief. 8.5" X 11"

Pamphlet N0008488 \$1.25

Acoustic Levitation with One Transducer

NASA

An experimental acoustic levitator for high-temperature containerless processing has a round cylindrical levitation chamber and only one acoustic transducer. Stable levitation of a solid particle or liquid drop is achieved by exciting the sound in the chamber to a higher-order (non-planar) resonant mode that makes a potential well for the levitated particle or drop at some point within the chamber. NASA Tech Brief. 8.5" X 11"

Pamphlet N0017488 \$2.25

Acoustic Levitator Maintains Resonance

NASA

An acoustic levitation system automatically adjust the sound frequency or chamber length to maintain the resonance necessary for levitation. Developed for containerless processing of materials at high temperatures, the system does not rely on microphones as resonance sensors, since microphones are difficult to fabricate for use at temperatures above 500°C. Instead, the system uses the acoustic transducer itself as a sensor. NASA Tech Brief. 8.5" X 11"

Pamphlet N0019488 \$2.35

Acoustic Pump

NASA

A solid state pump has been designed to pump materials without using any conventional moving parts. The pump uses acoustic radiation forces to input a momentum transfer resulting in flow of the material. It can be entirely miniaturized, does not invade the pumped environment, and is silent with no conventional vibration. NASA Tech Brief. 8.5" X 11"

Pamphlet N0061293 \$1.45

Acoustic Translation of an Acoustically Levitated Sample

NASA

A levitated sample can be moved quickly from hot to cold regions in the levitation chamber. The frequency of the sound produced by the transducers is adjusted by the feedback system to maintain the resonant mode, which levitates the sample midway between the transducers and the plunger regardless of the plunger position. Action of Force is Spiro-Vortex

Bloomfield-Moore, Clara Jessup

"Keely's latest discovery—that of the spiro-vortex action of currents of force—is so overwhelming in its simplicity of demonstration that it needs but to be witnessed to convince physicists that vibratory physics will place science on a height never before attained. This discovery solves problems with regard to the peculiar movements of the heavenly bodies which astronomical experts have never been able to explain satisfactorily. It also accounts for the explosions which, for years, impeded Keely's progress during his disintegrating experiments, breaking iron and steel tubes like pipe-stems, fracturing his ribs, and at one time paralyzing him for weeks."

Keely discovered that all forces manifest as a vortex motion. This paper gives some background on that discovery and what Keely said about it. 8.5" X 11"

Active Pulse Suppression of Structural Vibrations

Udwadia, F. E.

An algorithm for controlling the reactions of buildings and other structures to earthquakes initiates counterpulses when incoming shock pulses exceed a threshold level. By using this "go/no-go" criterion rather than continuously adjusting the response to every input excitation no matter how small, the control system needs less computation effort than do comparable closed-loop systems. Aerial Navigation

Bloomfield-Moore, Clara Jessup

"PRIESTLEY, who believed that all discoveries are made by chance, compares the student of nature to a hound wildly running after and here and there overtaking game; but "Providence sends chance, and genius moulds it to its own design." Edison well explained the difference between discovery and invention when he said that in discovery there must be an element of the accidental, and an important one, too; while invention is purely deductive. The story of the apple dropping from the tree and Newton starting with a species of Eureka he rejects absolutely. Maintaining that an abstract idea or a natural law may in one sense be invented, he gives it as his opinion that Newton did not discover the theory of gravitation but invented it; that he may have been at work on the problem for years, inventing theory after theory to which he found it impossible to shape his facts."

Moore, Clara Bloomfield. "Aerial Navigation". The Arena, August 1894, pg. 386-395. Discussion on the future of air transportation years before the Wright brothers. Keely's acoustical levitation (anti-gravity) system was being perfected at the time of this article and promised a true scientific and social revolution. Amplitude of Force

Keltz, Martha

"The amplitude of vibrations is directly increased or diminished by increasing or diminishing the size or number of creative aggregates. The human EGO, subject to the forces of love or hate, kindness or cruelty, forgiveness or revenge, is according to circumstances ruled or dominated by these forces in proportion to their intensity."

Excellent one act play re-enacting the trials and difficulties Keely confronted when being sued to reveal his secrets. Martha Keltz, like no other, has captured some of the true inner content and material in this insightful and candid play. A truly remarkable work! 8.5" X 7" spiral bound laminated cover.

An Old Miracle - New Science

Parmele, Mary

"There is inconceivable energy in this atomic motion. Its will and its will not are irresistible. Mountains of granite cannot hold it, and the foundations of the earth give way before it. Professor Tyndall says that the energy expended in condensing aqueous vapor into nine pounds of water, is equivalent to the "descent of a ton weight, urged by gravity, down a precipice twenty-two thousand eight hundred and twenty feet high." He says: "I have seen wild stone avalanches of the Alps which smoke and thunder down declivities with a vehemence sufficient to stun the beholder; yet to produce enough snow-flakes for a child to carry has required an energy competent to lift up these shattered blocks and pitch them to twice the height from which they fell."

Apergy: Power Without Cost

Morris, Charles

"Considerable attention has been given in previous numbers of the NEW SCIENCE REVIEW to the researches, discoveries, and theoretical conclusions of John Ernst Worrell Keely, the inventor of the notable "Keely Motor;" quite sufficient, it may be, in the opinion of many readers, in view of the technical language employed, and the fact that the utility of these inventions has not been demonstrated to the satisfaction of the general public. Yet the publishers of the REVIEW have excellent reason to believe that the results of Mr. Keely's researches are all that have been claimed for them, and that this fact will soon be publicly demonstrated. They desire, therefore, to offer to their readers a plain, matter-of-fact, businesslike statement of what Mr. Keely has actually accomplished; and the writer of the present paper has been requested to visit the workshop and investigate the apparatus of the famous inventor, and to state plainly and simply the results of his investigation."

Are Physical and Spiritual Energy Identical?

Parmele, Mary

"Whether science turns its glass out into the immensities of space, or in toward the equally fathomless abysses of the minute, there seems no bounds to the possibilities of discovery regarding the processes of nature. Yet each and every pathway leads at least to impenetrable mystery.

What use to know of the ultimate molecule and atom, if we are never to learn what endows it with life. What is life? What is death? What is pain? What is color? Perfume? What is there in a minor chord to make one weep? Thousands of hungry eyes are peering into the dark in search of clues to these encircling mysteries. But a little rift has appeared in the veil, through which some think they can see a great and illuminating truth. This truth is called sympathetic vibration."

A wonderfully beautiful article showing what sympathetic vibration is and how it is the motive force behind all that there is from the low molecular realms to the highest spiritual aspirations. If you've ever wondered just what the law of sympathetic vibration is and does - then this is the pamphlet for you. Reprint of the original article. Circa 1890. 8.5" X 11"

Atlin - Knowing I AM

Pond, Dale

"A few years ago a project was undertaken to create a machine to generate mechanical power that would produce useable electricity and drive machinery. This machine had been originally invented and built in the 1880s and did indeed generate mechanical power. The team, assembled to recreate this device, thought they could duplicate this instrument using modern technology. As innocent as this goal was - things turned out rather differently. The machine was built in a surprisingly short time. Did it successfully generate power? Not in the expected way but in a way so surprising as to be near unbelievable."

Pond, Dale

The Perfect Unique Gift for births, birthdays, anniversaries and special events.

The Divine Melody of your creation is replicated in a hand-crafted custom built windchime just for you. No two windchimes are exactly alike just as no two individual's are exactly alike.

The Chord of Life Windchime is as an instrument of attunement and centering for whom it is crafted, providing a potential for greater and greater harmony with your original life purpose and potentialities.

Each person came into materiality in a state of perfect harmony or concordance of vibrations. As they go through life this chord of vibrations becomes modified which may take on a discordant quality. These birth chord windchimes are designed to resonate the original Creative Melody through and by which you were born. The windchime makes that original chord strong, vibrant and balanced dissipating any discordant conditions and empowering and enlightening the individual.

The harmonizing action is accomplished through sympathetic vibrations.

The Chord of Life windchime if crafted of the finest materials. The windchime is made with pure copper tubes thus insuring a lifetime of care-free enjoyment. The hang-plate, clapper and wind-catcher are made of polished oak, maple or walnut and will last for many years.

Coherent-Phase Monitoring of Cavitation in Turbomachines

NASA

Cavitation is the process of boiling fluid which occurs when local fluid dynamic pressures in the areas of accelerated flow drop below the vapor pressure of the local fluid. The principle for cavitation detection is based on a unique phenomenon associated with cavitation physics, i.e., when cavitation occurs in a rotating system, the periodic rotational components (such as RPM and its harmonics) will amplitude modulate the wide-band high frequency noise generated from the collapse of cavitation bubbles. Such a Wide-Band Modulation (WBM) phenomenon (a narrow-band discrete signal multiplied by wide-band random noise) will generate hidden periodicity in a monitored dynamic response signal thus providing a unique signature in the high frequency region conducive to cavitation detection. 8.5" X 11"

Conductor-Backed Superconductive Coplanar-Waveguide Resonators

NASA

Conductor backed coplanar waveguide resonators operating at 10.8 GHz have been fabricated from Ti-Ba-Ca-Cu-O and Y-Ba-Cu-O thin films on LaAlO. The resonators consist of a coplanar waveguide patterned on the superconducting film side of the LaAlO, substrate with a gold ground plane coated on the opposite side. These resonators were tested in the temperature range from 14 to 106 K. At 77 K, the best of our resonators have an unloaded quality factor (Q) 7 and 4 times, respectively, larger than that of a similar all-gold resonator. NASA Tech Brief. 8.5" X 11"

Damon Method - Vibrational Application of Spinal Technique

Damon, DC, Dr. Claude

The Damon Method, with its three great principles, stands unchallenged. The more we see of it in our own practice, the more we hear of it from the field, the more we realize that the two great problems that confront us are: First, to make the Doctor himself realize the widespread effects of Hypertension as a Cause, and the effectiveness and dependability of Tension Control as an exclusive treatment. Secondly, to so present the technique that he or she cannot fail to apply it as we apply it, and thereby get the same positive results. 8.5" X 11"

Dashed Against the Rocks

Colville, William

"The time has now certainly come to unveil -to all who are in any way prepared to profit by such unveiling -the subtle operation of universal Force through the action of unchanging Law.

It is also decidedly a privilege as well as duty, devolving upon all who are somewhat acquainted with the facts of genuine SCIENCE to discriminate plainly and boldly between scientific teachings which are purely THEISTIC in their entire trend and sociolistic bombast, which in the mouths of the conceited and ill-informed is made a pretext for denying the very being of Supreme Intelligence, and heaping ridicule upon all who sincerely trust in the immortality of man as a spiritual reality."

Colville, William J., "Dashed Against the Rock", Boston: Colby and Rich, Publishers, 1894. Colville, a prolific writer, was a close friend and supporter of Keely's. He was also a Grand Master Mason. Dogmatism of Science

Bloomfield-Moore, Clara Jessup

"Henry Thomas Buckle, in a paper read at the weekly evening meeting of the Royal Institution of Great Britain, Friday, March 19th, 1858, said that "an exclusive employment of the inductive philosophy was contracting the minds of physical inquirers and gradually shutting out speculations respecting causes and entities; limiting the student to questions of distribution, and forbidding to him questions of origin; making everything hang on two sets of laws, namely, those of co-existence and of sequence; and declaring beforehand how far future knowledge can carry us. But," added this great man, "we shall not always be satisfied with seeing the laws of nature rest on this empirical basis; and the most advanced thinkers are looking to a period when we shall deal with problems of a much higher kind than any yet solved; when we shall incorporate mind and matter into a single study; when we shall seek to raise the veil and penetrate into the secret of things."

This paper explains why contemporary science could not and would not except Keely's scientific discoveries. It applies to the skeptics of today as though nothing has changed in the past 100 years. 8.5" X 11"

Doom of Steam or the Coming Force Exposition of the Keely Motor

Babcock, O. M.

"Dear Sir: — Being able to hear only the first of like Series of Lectures on the Keely Motor enterprise recently delivered by you in Chickering Hall, New York, I would suggest that you publish the series in pamphlet form for distribution amongst the stockholders of the Keely Motor Co.

I make this suggestion the more readily, because I believe the present evidences of progress made by Mr. Keely justify any one who is thoroughly acquainted with the condition of affairs, in so presenting the facts that present or prospective stockholders need not be under the necessity of acting altogether in the dark; and if in the presentation thus suggested you remove the veil of mystery which is popularly supposed to surround the enterprise, you will, in my opinion, do much to leseen the effects of real or supposed mistakes by the managers thereof - mistakes which are natural to all enterprises, and more particularly such as invite the operations of a speculative management, which is eminently the case with the Keely Motor Co.

The suggested publication is also the more desirable because of the success attending the alleged efforts of interested parties in suppressing the notice of your lectures in the regular news columns of the " daily press."

Exposition of the Keely Motor. A reprint of the original 1881 pamphlet of a series of lectures given by Mr. Babcock on the "Political Significance and Fitness to the Present Stage of Advancement in Science and Civilization" of Keely's Motor and Science. Dr. Abrahms and the Electron Theory

Hudgings, William F.

"It is the purpose of this booklet to acquaint the ordinary reader with the most recent findings of science in the field of physics, particularly in relation to living organism and the pathology of disease. Dr. Albert Abrams of San Francisco, being a pioneer in this field of physical research, has made certain discoveries of such consequence that much space is devoted to a detailed consideration of his findings. After his experiments have been described, the reader will find in Part II of this essay a full, popular treatise on the modern electron theory of matter upon which the Abrams research work is based. This part of the essay is really a simplified condensation of all the technical works on physical science of the past twenty years insofar as they relate to the electronic structure of atoms and to chemistry, recording every important discovery on the subject down to the present time."

Radionics development can be traced backwards in time directly from Delawarr from Ruth Drown from Dr. Abrahms from Dr. H. S. Lewis. Engineering with Love

Pond, Dale

Rudolph Steiner stated in 1913: "The science of the future will be based on sympathetic vibration." However, he may not have known sympathetic vibration is another way of saying Unconditional Love as will be illustrated herein. Love has been the base of most religions, societies and families from the dawn of time and acts as the foundation for the New Age philosophies. Unfortunately science and society, in the western world, has wandered far astray from this basic and most powerful of forces. The customary shunning and denying love is being transformed into giving and accepting Love! A search of the Internet, a scan of the many self-help seminars offered world-wide or review of a major bookstore will show a world-wide movement back to the place where it is okay for love to enter into our lives, homes and sciences. This is happening right now, before our very eyes, in our very hearts."

Essay Upon Force in Nature and its Effect Upon Matter, An

Skinner, John Ralston

"The following essay embodies an attempt to show that planetary movement can not be perfected by the theory of gravitation as received. Beyond this, suggestions are offered in support of the idea that planetary movements are caused by the effect of force on matter, not inherent in matter: and further, that the one, primal force on which planetary movement depends, modified by special effects upon substances differing in kind, in arrangement, and in position, is that which, under the modified conditions, is called by the various names of force, as of attraction and repulsion, cold and heat, electricity, magnetism, weight, etc.- in other words, it is thought that differences of forces by name should be taken as being expressions of differences in manifestations of a same force, but not of specific differences of forces;-the differences as to manifestation arising from peculiarities of matter on which the one force acts"

This excellent book presents subtle changes to the conventional scientific systems. The emerging paradigm was first seen in the early 1800s before it was 'forgotten'. It is believed that Skinner had intimate contact with Keely and this book details some of the insights that led Keely to some of his discoveries. (1869) 8.5" X 11" Also in pdf format.

Ether and Its Functions

Fitzgerald, Professor George Francis

"When we more carefully consider matters, however, we must concede that this way of speaking does not accurately represent even the popular view of nature. Still less does it represent the view that must be taken by every diligent observer and accurate thinker. In the case of an empty room, everybody acknowledges that it is really full of air, and that to speak of it as empty is not absolutely accurate, though sufficiently so for ordinary purposes. It does not deceive those whom we are speaking to. Quakers even have not objected to use the term. It is defensible on the same plea as stating that one is "Not at home." Neither statement is verbally accurate, but neither statement deceives, and each is, in consequence, quite legitimate. It does not appear at first sight, however, that there is any obvious way in which it is inaccurate to speak of interstellar space as empty. There are, no doubt, stars and comets and nebulae and meteors, but between them surely space is empty. And yet even popularly a place is spoken of as "full of light." Surely the space all round the sun is "full of light." Can we, with perfect accuracy, speak of a space as empty which is full of light?"

Field Resonance Propulsion Concept

NASA, Holt

The speculative "propulsion" concept described in this paper was presented at a special session of the 15th Joint AIAA/SAE/ASME Propulsion Conference (June 18-20, 1979), "Propulsion Concepts for Galactic Spacecraft". The concept was developed as the result of private, unofficial research. NASA is not involved in UFO research. However, the research which may be stimulated by this paper could result in the verification of the essential elements of this concept and in feasibility studies concerning the development of a new generation of NASA spacecraft. Alan C. Holt

ABSTRACT

A new "propulsion" concept has been developed based on a proposed resonance between coherent, pulsed electromagnetic wave forms and gravitational wave forms (or space-time metrics). Using this concept a spacecraft "propulsion" system potentially capable of galactic and inter-galactic travel without prohibitive "travel times" has been designed. The "propulsion" system utilizes recent research associated with magnetic field line merging, hydromagnetic wave effects, free-electron lasers, laser generation of megagauss fields, and special structural and containment metals. Research required to determine potential, field resonance characteristics and to evaluate various aspects of the spacecraft "propulsion" design is described. NASA Tech Brief. 8.5" X 11"

Formation of Rotating (Vortex) Rings of Air & Liquids

Rogers, Wm. B.

"It has long been a familiar fact that the bubbles of phosphuretted hydrogen gas consisting of PH₃ with an admixture of PH₂, give rise by their explosive combustion in the air to a ring of white vapor-like phosphoric acid, which dilating as it ascends exhibits a rotation of each vertical element around the curved axis of the figure. A similar motion is sometimes discernible in the smoke from a cannon, and in the steam which escapes by momentary puffs from a steam-pipe, and as expert smokers know, such revolving rings are readily produced by ejecting the smoky breath in a peculiar manner from the rounded opening of the lips."

An excellent paper on the phenomena of vortex rings formed from smoke, etc. Goes into quite a bit of detailed observations. (1858) Illustrated. 8.5" X 11"

Gain-Compensating Circuit for NDE and Ultrasonics

NASA

"Gann Harmony" The Law of Vibration - Gann II Course Manual

Dr. Jerome Baumring

A high frequency time-gain compensation circuit was designed and built for a wide variety of applications in nondestructive evaluation and ultrasonic measurements. The circuit features a high signal to noise ratio, a wide signal bandwidth (in excess of 50 MHz), and a large dynamic range (greater than 50 dB). The control bandwidth of 5 MHz assures accuracy to the control signal.

God Will Work With You but Not For You

Russell, Lao

God Will Work With You But Not For You dynamically answers the age-old questions "Who am I? What am I? Why am I here?" Human Beings are the greatest mystery of the "unknown." We have conquered the seas, the skies, the elements and the very forces which move the universe. We, the great discoverers and inventors of many things, have not as yet fully discovered ourselves. In answer to the question of "man the unknown," Lao Russell writes: "Let us transform the world by renewing of the world-Mind." That transformation can take place only by our acquiring knowledge of our inseparable and eternal moment to moment unity with a comprehensible Creator, and of our unity with all people and Nature." This transforming knowledge is the theme of the Living Philosophy vitally presented in God Will Work With You But Not For You. "The whole purpose of this book is to point the way to all knowledge and power for you. To attain it you have to acquire the power to think inwardly instead of merely to sense outwardly." — Lao Russell

Great Flood Mystery

Iverson, Ben

A geological study of the broad view of North America Geology with emphasis on the general background of many present geological reports.

THESIS: 2000 years ago, two floods of over 5000 cubic miles of water came out of northern Canada at tremendous speed, sufficient to completely demolish large gaps in the Rocky Mountain chain. From Jasper, Canada north, across Montana and Wyoming, and across New Mexico/Arizona. The routing, the force and direction of this flood is followed along with the destruction along the way. The deposition pattern of an estimated 4000 miles of soil is also established, reaching, in one case, an elevation of 11,000 feet above sea level. Speeds of the flood were up to 500 miles per hour and maintained by the Coriolis force.

Harmonies of Tones and Colors - Developed by Evolution

Hughes, Mrs. Fitzgerald

"The scheme endeavours to prove that the development of harmonics of sound and of colours is regulated by the law of Evolution as gained from the Scriptures - Youthful impressions regarding my great-uncle Dr. Darwin's views - My cousin Charles Darwin's views touched upon - The scheme involves the belief that life developing from the Almighty is the general key to disentangle the intricacies of the Natural Sciences - A remark of Sir John Lubbock's quoted-The development of Numbers the stream of Time, the Sevens of Creation, &c., may eventually be proved by the same laws."

Mrs. F. J. Hughes, a grandniece of Darwin, gained from her study of the Bible the material for her book on "The Evolution of Tones and Colours," which work, Keely says, saved him years of research in the realm of inaudible sounds possessed by man, without which his various organs would be utterly useless. Bloomfield-Moore sent copies of this book to every known university because of its value to scientific research as proven by Keely. Reprint of the original book. 8.5" X 11"

Hybrid Contactless Heating and Levitation

NASA

A contactless material-processing concept involves the levitation, heating, and cooling of a sample of material through the coordinated use of electromagnetic and acoustic fields. The electromagnetic field would be used for both levitation and heating, while the acoustic field would be turned on to levitate the sample whenever the electromagnetic field must be weakened below the minimum strength required for levitation. Interferometer Detects Acoustic Emissions in Composites

Wade, Janet

Acoustic emission in prestressed composite panels has been detected using embedded single mode optical fibers. Static loading of the composite matrix produces acoustic emission events, pulsed ultrasonic waves, which mechanically modulate the embedded fiber geometry and phase modulate the transmitted optical field. This modulation is detected by optical interferometry and Fourier optical processing techniques to produce an electronic signal proportional to acoustic field amplitude integrated along the length of the fiber in the specimen. Keely and His Discoveries

Bloomfield-Moore, Clara Jessup

From the Preface: "This is the thing which has happened in the case which this little volume comes forth to relate and explain. It is not intended to unfold the systematic methods of the gifted genius concerning whom it speaks; that will come, in his own words, in due time. The aim of this volume is to show the course of events in relation to his researches; and to open the mystery of how it came about that he should have been so much misunderstood and hindered. It tells how he, in the dim dawn of initial inspiration, first glimpsed and touched THE POWER which is about to be given to the possession of mankind for the supply of wants, and the relief of toil. How he struggled and wrestled like the patriarch of old who said, "I will not let Thee go, except Thou bless me." How men of the world, seeing the struggle and estimating the power, said, "Make haste and harness this power to our machinery, and we shall pay you." How, in his need of means, he was tempted and fell; making an attempt to harness to machinery a power whose very form and kind he had not yet been given to discern. And then, when this too hasty attempt had failed, how the disappointed world laughed and mocked, and fumed, and called him an impostor.

This volume seeks to explain this KEELY MYSTERY; and to show that although a mistake was made, it was only a passing mistake. The mistake has been rectified; and the seer, now in possession of peace and privacy, has fully sighted the power, and is making progress in bringing it into subjugation."

The most authoritative biography of John Ernst Worrell Keely and his work. Written by the woman who financed his work for over ten years and understood Keely and his science. This volume is a chronology of his work and life from 1872 through 1892. This title has gone through any number of printings since it was first published in 1893. 8.5" X 11" 150 pages spiral bound.

Keely Motor Secret

Bloomfield-Moore, Clara Jessup

"The Keely Motor secret teaches that the various phenomena of the human constitution cannot be properly comprehended and explained without observing the distinction between the physical and material and the moral and spiritual nature of man. It demonstrates incontrovertibly the separate existence and independent activity of the soul of man, and that the spirit governs the body instead of being governed by the body."

Moore, Clara Bloomfield. "The Keely Motor Secret." Lippincott's, 1887, pg. 300-309. An exploratory paper into the whys and what-fors of Keely's motor and its secrets. Why orthodox science couldn't grasp (and still doesn't) its basic functioning and importance to society at large. 8.5" X 11"

Keely Musical Dynasphere, IANS-1996

Pond, Dale

For the first time details concerning Keely's original Musical Dynasphere or Globe Motor are given out publicly in a 50 min. lecture by Dale Pond before the International Association for New Science, Denver, 1996. This device has been under development by a research and development team of very capable people since late 1995. This machine and its dynamics push the envelope very far indeed.

Keely's Musical Dynasphere

Keely, John Worrell and Pond, Dale

The construction and theory, in Keely's own words, of how his musical dynasphere was built and operated. Keely describes in his fabulous jargon the construction ideas and operating dynamics of these wondrous and beautiful rotating spheres. Includes nine pages of excerpts from eye-witnesses who saw these motors run under various conditions and configurations. Photos and illustrations. 8.5" X 11"

Lux Naturae (Natural Light)

Sinclair, David

"THERE is nothing useless or merely ornamental in Nature. She has no forces which are not at the service of man, nor is there any secret about the working of her laws into which he may not successfully inquire without presumption. No scientific research for truth is, in itself, a presumption; and in no case can its true course lead to ideas of infidelity, or to anything derogatory to the highest interests of man. Science has recently, with extraordinary success, provided lever, fulcrum, and power to raise civilization such as no other stage of its development has supplied. The first dark whispers of geology, being insuppressible, now I loudly attest the truth. The truths announced by Darwin stand boldly out as no mere insinuation can stand, while his side-lights of what seemed true, but are not have already vanished like a Will-o'-the-wisp. The works of great men in their laboratories, by the revelation of quondam secrets, have exalted truth as Moses raised the brazen serpent. Just as sure as there is any provision made for created beings, just as sure are the preservation, development, evolution and dominance of truth, by law, provided for; and no agent of progress has done more towards this highest evolution than science has with dry, hard, matter-of-fact revolutionary revelations."

A fine treatise on the natural laws that govern human action and development. Mr. Sinclair touches deeply on the sixth sense well before this sense was recognized by conventional science. This force, the mind force, is the basis of Keely's work and manifests through sympathetic vibration into all things as Mr. Sinclair demonstrates. 8.5" X 11"

Newly Discovered Law of Physics

Allen, Stephen

"Cycle upon cycle of recurring ages must have passed, after the creation of man upon the earth, before he could have had any real consciousness of the magnitude or governing laws of the Universe. The sun by day, and moon and stars by night, with all their varying phases of beauty and sublimity, must have filled his mind with wonder, as well as awe, and turned it with reverence to a higher power as the Creator and Author of his existence. The unwritten and pre-historic record of the conflict, of the human mind, in searching for the truth of what was daily seen and felt, must have been severe beyond description, and made, in some measure, apologize for the great mistakes made by Scientists, in their expressed opinions of creation, since history commenced the record which reaches down to our day."

Newton of the Mind - The Propellor of Keely's Airship Described

Bloomfield-Moore, Clara Jessup

"More than twenty years ago, Keely, by seeming chance, discovered the unknown polar flow, and without giving any attention to research, on the line of its origin or of its operation, began to construct engines to apply the energy to mechanics. It was not until he had invented his marvelous researching instruments that his true work of evolution began in 1888, which, completed in 1893, has now borne the test of demonstration and given him command of a vibratory circuit for running machinery, both for terrestrial use and for aerial navigation."

"The Propeller Described," New Science Review, Vol. 1, 1895, pg. 46. Keely's "propellor" is similar to the present day ion drive systems yet very different. It was all acoustic. He claimed this propellor would propel his airship at 300 mph - and this is in 1890! There are many rumors and suggested news articles claiming he actually did it. 8.5" X 11"

Zak, Michail and Meyers, Ronald E.

A report presents a theoretical study that addresses the persistent problem of explaining the random aspects of the flows of real fluids in terms of the classical governing equations. 1986- 1989 250p. Delux Quarto Hardcover Facsimile Edition. Maroon Suede w/Guilt Lettering. These Notes Present A Detailed Record of Dr. Baumring's Teachings, Theories, Diagrams & Market Applications as Presented at the Investment Centre Seminars. Each Seminar Lasted Two Eight-Hour Days. The Notes Included in This Set Came from 14 Different Presentations of the Nine Seminars with the First Four Seminars Having Been Repeated More Than Once Each. Dr. Baumring Did Not Follow Exact Lecture Notes But Made Spontaneous Orderly Presentations, Following a Previously Selected Series of Projected Images, Selections of Text & Charts, Upon Which He Would Elaborate During the Seminar. As Students Asked Questions Dr. Baumring Would Explain In Greater Detail Various Aspects of These Topics, so That Each Repetition of An Individual Seminar Contains New Information & Further Elaborations Upon Different Points. For An Extremely Detailed Description of Contents See The Gann & Baumring Category and the Financial Market Forecasting Section of This Web Site. The Bulk Purchase of The Complete Series of Lecture Notes Includes a \$250.00 Discount. For A Greater Bulk Discount Please See The Complete Course Manuals & Lecture Notes.

On the Reduction to Normal Air Temperatures of the Platinum Temperatures in the Low-Temperature Researches of Professors Dewar and

Dickson, J. D. Hamilton

Very interesting paper on the phenomena of measuring temperatures as a function of electrical resistance of platinum that changes with temperature. Reminds one of some of Keely's laws of vibration. Originally published in 1898 and includes another article: "The Thermo-Electric Diagram from -200° C. to 100° C. Deduced from the Observations of Professors Dewar and Fleming." by the same author. *These papers are important in the study of Keely's gold, silver and platinum wires.*

Operation of the Vibratory Circuit

Keely, John Worrell

"The working part of this device consists, first, of an outside ring carrying on its inside face nine pieces -- equidistant from each other --- called polar accelerators; which constitute the polar field or polar circuit. Second, another ring of less diameter, situated inside of the larger ring, and carrying on its face eight disks, with a triple grouping in each, representing the depolar field, or field of high polar interference."

Keely describing how the circuit of vibration energy (in his Disintegrator - what we would call today an analog Signal Generator and Synthesizer - it also dissociates water into etheric vapor) was developed and operated and what he did with it. 8.5" X 11"

Orienting Acoustically Levitated Aspherical Objects

NASA

By suitable adjustments of the amplitudes and phases of the three acoustic fields in a three-axis acoustic levitator, the orientation of an aspherical levitated object can be controlled, and the degree of its asphericity can be measured. The orientation-and-measurement technique can be used to manipulate workpieces during containerless processing or to measure the approach to desired asphericity in small objects like targets for laser-fusion experiments. Pendulograph

Andrews, Rev. John

Excellent work describing the construction and function of an articulated pendulum and how it creates uniform complex motions when drawing magnificently beautiful waveforms. The basis of which are music ratios - fully explained and graphically demonstrated. A chord of music notes can and does form mathematically correct waveforms. This device was very "in" during the 1880s and 1890s. Explains very well the numerical relations of vibrations. The Pendulograph is the same as the Harmonograph. 8.5" X 11"

Physics of Love - The Ultimate Universal Laws

Pond, Dale and others

Explore Keely's 40 laws of physics of love, of harmony and of consciousness in an easy-to-understand and exciting book. The universal laws in this book are applicable to music, electronics, mechanics, healing and all branches of science and philosophy. This rapidly expanding science demonstrates the commonality that underlies all phenomena - vibration. Another name for Sympathetic Vibration is Love. This work is designed to give you an insight and understanding of the basic principles operating within the realm of sound and vibration. This book was primarily written to explain the basics of SVP as found in "Universal Laws Never Before Revealed: Keely's Secrets." It is also designed to enhance the evolution of a more wholistic philosophical concept of life and nature. 8.5" X 11" 145 pages. ISBN 1-57282-002-0

Testimonials:

"It's slow reading - at times difficult reading, but when one finishes there is a strong and basic insight into fundamental principles. I cannot recommend it highly enough." Special from Frederic Stoessel: Recommended reading for those who want to know answers to what is really going on.

"I did, however, want to thank you for your warm list welcome and tell you how thrilled I am to be reading your "The Physics of Love" book. I have only recently come across it, but this is definitely the right timing, as I have been intensely studying Earth energy, vibrational frequencies and everything in between for two years. I'd been searching for exactly what it was that I'd "discovered" - and this was difficult, since I'd been exploring so many different functions of vibratory physics... genetics, color therapy, health, sound, psychology, radionics, crystallography and how these might be tied into ancient history and ancient art.

I was extremely pleased to see your umbrella diagram on page 4, breaking "Sympathetic Vibratory Physics" into all the various fields. This was a beautiful confirmation for me that even though I might be studying many parallel "lines" , I am still on one basic track." C. 10/98

Playing in Grace and Mercy

Pond, Dale

"During the development phase of the Dynasphere project there were many messages from Spirit advocating the adoption and use of more joy in one's life as a prerequisite to working with Atlin, obtaining rotation or other branches of subtle force physics. With joy involved the work becomes play and the etheric subtle forces literally come out to play with us in highly refined and joyous moment of love expressing itself very much like young children happily at play. But what is joy? What is love expressing itself? These are concepts a little foreign to the Western mind set of work hard and make money. A grim reminder we live in a material world. Here, we are being asked to set this aside and find the joy in playing with the effectual dynamics of a higher world which had been forced to find refuge and survive in churches and the like. After all playing was for children."

Ever wonder why only Keely could operate his machines? We are beginning to find out. This paper presents some of the foundation ideas and concepts behind this unusual phenomena. The answer seems to lie somewhere between telekinesis (Mind in Matter) and reverence for all things. 8.5" X 11"

Propositions of Astronomical Circles

Keely, John Worrell

Proposition I: The respective and relative motion of three gravitating bodies revolving together and about each other, is as four to three, or one and one-third of one primary circumference.

First Proportion: As one primary circumference of a circle is to the moon's time about the earth, so is the moon's time about the earth to the earth's time about the sun."

An excellent paper detailing the relationships of planetary properties (orbits, sizes, etc.) relative to the Quadrature of the Circle. Some attribute this marvelous and singular work to John Parker, mathematician. 8.5" X 11"

Propositions of Geometry

Keely, John Worrell

"Proposition I

One of the relative properties between straight lines and a perfect curve or circle is such, that all regular shapes formed of straight lines and equal sides, have their areas equal to half the circumference multiplied by the least radius which the shape contains (which is always the radius of an inscribed circle) than which every other radius contained in the shape is greater, and the circle has its area equal to half the circumference multiplied by the radius, to which every other radius contained in the circle is equal."

Originally from Keely, these propositions were included in a paper read by John A. Parker before the New York Mathematical Society. Relative to the Quadrature of the Circle.

All matter and energy interchanges are equal (reciprocal) and proportional. Wentworth's masterly treatment of the many propositions of proportion present a simple and clear understanding of these two ever-present attributes of matter, energy and geometry. Further it is now clear The Theory and Propositions of Proportion form an important and essential part of Iverson's Quantum Arithmetic.

Psycho Harmonial Philosophy

Pearson, P.

In the great field of modern as well as ancient psychic literature, we find many learned authors attempting to solve great problems: How did the universe and all things therein come into existence? The probable aim and ultimate end of all material things? When we undertake to deal with these great questions it becomes necessary to state in advance that Psycho-Harmonial Philosophy as promulgated in this work is based upon the most solid foundation extant - the all-embracing musical scale - which as a Gibraltar rock of truth cannot be shaken or overthrown. 8.5" X 11"

Pythagoras and the Quantum World - Vol. I

Iverson, Ben

Reprint of the original hard cover volume 1. This is the first volume of Quantum Arithmetic which sets the foundation for the subsequent volumes. Mr. Iverson has devoted 40 years of his life to develop the principles of QA. This is system will play a major part in the New Sciences. It is based on ancient arithmetic and wholistic principles. 8.5" x 11"

Pythagoras and the Quantum World - Vol. II

Iverson, Ben

This volume is one of Ben's original works. 8 1/2" X 11". Extending the technical presentation of Quantum Arithmetic plus various applications. Natural arithmetic, number theory and geometry is the basis of all natural phenomena. Mr. Iverson has devoted 40 years of his life to develop the principles of QA. This is system will play a major part in the New Sciences. It is based on ancient arithmetic and wholistic principles.

QA-1 Natural Arithmetic

Iverson, Ben

Volume 1 in set of 3. The basic introduction to Quantum Arithmetic. This should be understandable to a student which is 10 years of age, and is grounded in addition, subtraction and multiplication. A little basic algebra would be helpful. These books are designed for school text books. Although they can be started at a young age, it does not mean that more highly educated persons will find it easy. They may find it quite difficult because they will have certain learnings to forget. 8.5" X 5"

QA-2 Natural Arithmetic

Iverson, Ben

Volume 2 in set of 3. Builds on QA-1 and expands Quantum Arithmetic to a useable level. This book goes into division of Quantum Numbers into Male and Female. Quantum Numbers are explained. The important position of the ELLIPSE in mathematics is stressed. This leads us to an understanding of "Quaternions", and the relationship within wave mechanics. Later on the subject of "Fractals" comes to the front. 8.5" X 5"

QA-3 Natural Arithmetic

Iverson, Ben

Volume 3 in set of 3. Begins the application and theory, (no proofs are given in these books. Proofs are given in the books below). The subject of numbers being divided into octaves is discussed, and goes from here into applications in Music and Chemistry. The proven Law of Harmonics is given along with the solution to tones of Music Of The Spheres. "Quantizing" is explained. There is more emphasis placed upon the organization of energy. All of these books are taking an important place in the research for New Energy which is free for the taking. 8.5" X 5" perfect bound.

Quadrature of the Circle

Hull, George R.

"In QUADRATURE OF THE CIRCLE Revealing THE TRUE VALUE OF Pi, we explore and expand upon Mr. Parker's findings. In clear, up to date English the central principles of the circle are revealed which allow the true and correct value of Pi to be calculated. Several important characteristics of the the arc, straight line, circle, triangle and regular polygon which have not been given due recognition are explored. Methods for constructing each geometric shape are given and the great importance of the Pythagorean or 'right' Triangle described. General formulas are developed allowing any regular shape to be made equal to another by area, perimeter, or proportion."

In clear, plain English, the central principle of the circle and triangle are revealed which allow the true and correct value of pi (π) to be calculated. The Quadrature of the Circle is solved and demonstrated in step-by-step easy to follow procedures. Extensively illustrated. 8.5" X 11" 133 pages.

Radiant Energy, Achzehner

Achzehner, Bob

Originally compiled for the layman in 1926 from excerpts of writings of Dr. T. Henry Moray. In the study of these pages one should consider that both matter and radiations have corpuscular properties as well as wave properties. The corpuscular properties are evident when recognized as highly localized events of very short duration with specific values of electric charge, energy and mass. The wave properties can be proven in different ways which have been proven and taught for so many years. 8.5" X 11"

Soulmate Cosmological Action

Dr. Henry & Erika Monteith

Dr. Henry C. Monteith, a mathematical metaphysician, and Erika G. Monteith, a pianist and pedagogue of music, were ordained by Yahweh, from the beginning of time, to culminate their soulmate union and experience the awesome bliss of Its Oneness enfolded in Its Light and Love.

As we emerged from the womb, our first cries were yearnings to find each other in this lifetime because the inevitability of it was ingrained within our subconscious minds. We evolved through the agonies of war and painful inflictions to our bodies and minds, generated by disease, physiological defects, and man's inhumanity to man. Gradually, as we learned the lessons, taught by our enlightening experiences, our spirits moved closer and closer together. Then suddenly, after 62 years of evolving and searching, we found each other at last! Then the heavens opened; and as the Light of Yahweh shined down upon us, it bound us together with Its awesome love and ordained that we know the bliss of Its Oneness forever.

In this book we describe the path we followed and the Sun-Cross we carried to make our personal contribution to the evolution of the cosmos and obtain our crown of eternal bliss. It can only serve as a guide to help you find your unique path along which you must carry the Sun-Cross for yourself. Soulmate Oneness is not a gift that is handed down from Heaven. It must be earned by evolving through the agony and the ecstasy of life's experiences.

Stirling-Cycle Refrigerator Containing Piezoelectric Pumps

Anonymous

Part 1 The invention uses a special hemispherical-shape disk made out of piezo-electric material recently developed. One of the faces of the ceramic piezo-electric disk has been chemically reduced during the forming of the ceramic. This reduction imparts the hemispheric shape to the disk when the disk is at rest, i.e. when no electric input is supplied. Application of an electric input causes an electric field between the faces of the disk, and in response the hemispherical shape of the disk changes. Depending on the polarity of the applied electric field the hemispherical shape either flattens or heightens.

Part 2 of the invention is a new type Sterling cycle refrigerator. Sterling-cycle refrigerators operate on a closed thermodynamic regenerative cycle with isothermal compression and expansion of the working fluid at different temperature levels. As an integral part of Sterling-cycle cryogenic refrigerators pump devices are needed. The new piezo-electric pump device of part 1 of the invention is used in the new refrigerator as a high-performance compressor and expander pump. To further improve the new refrigerator performance, the invention also features a displacement boost transfer pump to optimise heat exchanger performance. External inputs to the displacement pump are used to control whether at any one time laminar or turbulent flow exists in the heat exchangers for additional improved heat exchanger performance. Structure of Ether and Its Subtle Forces

Stranges, Dawn

"The magnificent energy matrices which coalesce to form galaxies also determine your health, the nature of atomic bonds, and all dynamics in between. This paper will discuss the structure of Ether and those forces, advancing a generalized, panoramic perspective. Better yet, and more importantly, the dynamics discussed can be applied to everyday life, and used to more deeply grasp the subtleties of subtle force physics. The author's work on two Etheric devices and case studies from her practice will be offered as evidence that the dynamics discussed hold much promise for improving the quality of life. The Universe is all One dynamic, and growing to understand it in broader terms makes all of life more understandable. Above all, dynamics are presented to catalyze the reader's deeper insights."

Dawn's excellent paper prepared for and presented at the Conference on Foundation and Fundamental Principles of the Universe, Grass Valley, California, 1997. This document is short but gives an absolutely essential view of the ether as it is in nature and its importance to us in science and philosophy. She also goes on to relate how to engineer the seven different ethers and discusses its use in the Keely Musical Dynasphere and her own invention the Sophigurate healing device. 8.5" X 11"

SVP Cosmology Part 14 - Keely's Mysterious Thirds, Sixths and Ninths

Dale Pond

14.00 - Rhythmic Balanced interexchange between Attraction and Repulsion - "This principle of rhythmic balanced interchange between father-mother lights of gravitation and radiation is fundamental in all creating things." [Russell, The Secret of Light, page 150]

MacVicar writes: "Every individualized object assimilates itself to itself in successive moments of its existence and all objects tend to assimilate one another." [Snell Manuscript]

14.01 - Hints from Bloomfield-Moore - "If the multitude of so-called laws of nature could be resolved into one grand universal law, would it not be considered a great step in the progress of scientific knowledge? This is what our pioneer claims for his discoveries, one law working throughout nature, in all things; for, as Macvicar says, the productive and conservative agency in creation, as it exists and acts does not consist of two things, "idea" and "power"; but of a unity embracing both, for which there is no special name. The relation between the Creator and the Creation, the First Cause and what he has effected, is altogether inscrutable; but intelligence acting analytically, as it cannot be kept from doing, insists on these two elements in the problem, viz. idea and power.

"The law of the universe is a distinct dualism while the creative energies are at work; and of a compound union when at rest."

SVP Cosmology Part 15 - Dissociating Water Acoustically

Dale Pond

15.01 - Introduction - There is and has been much conversation about Keely's extraordinary dissociating of water into its constituent components. Most believe he did this with vibration as in sound vibration. This view does not reflect what has been written about his actual experiments, witnessed by many scientists and engineers. Keely used oscillation which is a motion somewhat different than vibration. See Part 9 What Vibration Is wherein the differences between these two motions is discussed. These two motions are NOT the same as we can see by manipulating either one of them does not produce the same effects in the other. Keely's dissociation process, acoustically speaking, is nothing other than the disintegration of molecular and atomic mass into its constituent parts (electrons, photons, etc.). This dissociated water may be a vapor, gas, ultra-gas, plasma or etheric (sub-quantum) tenuous gas. Keely called one division "etheric vapor" under a certain order of subdivision. Certain types, levels or divisions of this gas/vapor are sensitive to Will Force.

15.02 - Liberating Ozone from Water - "In one [Keely] experiment in liberating ozone by molecular percussion, including luminosity, a percussive molecular force of 110,000 lbs. per square inch was registered on the testing lever. This enormous pressure caused the heavy steel parts to so bend and bulge that the instrument was at that time unfitted for further experiments and had to be repaired.

"The [etheric] vapor from the liberator registers 20,000 lbs. per square inch when the rotary atomic oscillation is 1333 1/3 times the normal diameter of the atmospheric molecule." [Snell Manuscript]

Certain types, levels or divisions of this gas/vapor are sensitive to Will Force.

15.02 - Liberating Ozone from Water - "In one [Keely] experiment in liberating ozone by molecular percussion, including luminosity, a percussive molecular force of 110,000 lbs. per square inch was registered on the testing lever. This enormous pressure caused the heavy steel parts to so bend and bulge that the instrument was at that time unfitted for further experiments and had to be repaired.

"The [etheric] vapor from the liberator registers 20,000 lbs. per square inch when the rotary atomic oscillation is 1333 1/3 times the normal diameter of the atmospheric molecule." [Snell Manuscript]

SVP Cosmology Part 16 - Electricity and Magnetism

Dale Pond

16.01 - Introduction - Was Maxwell et al on the right track with their descriptions of electricity and magnetism? Maybe - depends who you BELIEVE because science (KNOWING), to this day, does not honestly know what electricity and magnetism is. It is fairly well accepted now that an electric current is NOT a flow of individual and discrete electrons. One reason we know this is so is because electrons are not discrete entities but are in fact (as originally conceived) a unit of measure; i.e., the smallest possible quantity of electricity. The electron, the first subatomic particle, was "officially" discovered in 1897 by J. J. Thomson however we know Keely worked with a wide variety of subatomic particles years before that.

16.02 - Walter Russell describing what electricity is - "Electricity is the servant of the God-Mind. Electricity expresses the desire in the God-Mind for creative expression by seemingly dividing the One still light into transient waves of spectrum divided positive-negative colors of light." [The Secret of Light, page 50]

"Electricity is the motivative force which projects the One Light of Mind two ways to create cycles of light waves for the purpose of expressing thought cycles." [The Secret of Light, page 57]

SVP Cosmology Part 17 - Gravity and Levitation

Dale Pond

Sir Isaac Newton: "That one body may act upon another at a distance through a vacuum, without the mediation of any thing else, by and through which their action and force may be conveyed from one to the other, is to me so great an absurdity, that I believe no man who has in philosophical matters a competent faculty of thinking, can ever fall into it." (Newton did not consider sub-quantum phenomena such as sympathy...)

17.01 - Discovering Cause of Gravity - "In the paper of the Rev. H. W. Watson, on "The Progress of Science, its Conditions and Limitations," he tells us that every thinking man recognizes the subjective Self and the objective non-Self, and that this non-Self, so far as it manifests its existence through the senses, is the object of investigation of natural philosophers; but he admits that their investigations have not bestowed upon modern science any results to justify the language of causation. Universal gravitation is declared to be a vast generalization, telling us that there is no more, but yet just as much, of mystery in the whole sequence of astronomical phenomena, as in the most humdrum processes of every-day experiences. The unfamiliar has been explained by the familiar, and both remain in their original mystery. The mystery, attendant upon gravitation, Kepler prophesied would be revealed to man in this age: and the cautions and inductive investigations which Keely has been pursuing, since 1888, have enabled him to demonstrate that the unknown force, which for fifteen years had baffled all his skill, is the same condition of sympathetic vibration which control nature's highest and most general operations:- the identical force which Faraday divined when he wrote, in 1836: "Thus, either present elements are the true elements, or else there is the probability before us of obtaining some more high and general power of nature even than electricity, and which at the same time might reveal to us an entirely new grade of the elements of matter, now hidden from our view and almost from our suspicion." [Bloomfield-Moore, Keely and His Discoveries]

17.02 - Gravity Defined by Keely - "Gravity is nothing more than an attractive, sympathetic stream, flowing towards the neutral center of the earth, emanating from molecular centers of neutrality; concordant with the earth's center of neutrality, and reacting its medium of affinity with a power corresponding to

SVP Cosmology Part 18 - Mind, an Engineerable Force

Dale Pond

"The earth and the universe, as related to man, came into being through the Mind - Mind - of the Maker, and, as such, has its same being much as each atomic force multiplies in itself -" Cayce (900-227)

"We must assume behind this force [in the atom] the existence of a conscious and intelligent mind. This mind is the matrix of all matter." --Max Planck, accepting the Nobel Prize for Physics, 1918

"The time has arisen in the earth when men - everywhere - seek to know more of the MYSTERIES of the mind, the soul, the SOUL's mind which man recognizes as existent, yet has seen little of the ABILITIES of same." Cayce (254-52)

"Mind is the Master power that moulds and makes, And Man is Mind, and evermore he takes The tool of Thought, and, shaping what he wills, Brings forth a thousand joys, a thousand ills:-- He thinks in secret, and it comes to pass: Environment is but his looking-glass." James Allen

18.01 - Introduction - That Mind (Consciousness) has an influence in and over matter can no longer be denied. Thirty years of research at the Princeton Engineering Anomalies Research labs has established beyond a doubt this relationship exists. It is further held the brain, as grey matter, is not the mind but is as a receptacle or holder for the force or condition of Mind much as a coil in an old-fashioned radio is not the remote broadcast radio signal but is permeated by the remote broadcast radio signal and from which coil this "outside" force is made available to the adjunct circuitry (the body). Keely regarded the brain as a collection of acoustic resonators where the convolutions has different chords (waveforms) of vibration.

SVP Cosmology Part 2 - Origin of Polar States

Dale Pond

2.0 - Introduction - It seems to this author that for motion to exist there is required certain conditions. There must be a medium and this medium must possess an imbalance of potential, charge or any other condition. If we use the air as our medium the imbalance could be hot and cold, high and low pressures, wet or dry and ionization of positive and negative electricity. These are the generally accepted forms of imbalance in the gaseous volume of air about our planet. Should we consider a volume of the highest form of interetheric substance its form of imbalance would be potentized or not with Mind Force. This polarization of potential would increase as the particle's densification increased until we begin to see electricity and magnetism manifesting as Force and Energy. This of course being the particles themselves while the volume of particles would take on great swirling motions as these polarizations increased as the resultant vibration and oscillation frequencies increase thus setting in action another form of motion derived from harmony and discord of those frequencies. This condition could be termed sympathetic attraction and anti-sympathetic repulsion. Harmony being attractive and discord being repulsive.

As we've come to see and will appreciate more as we progress science has been conveyed through society and time as myths and metaphors. For instance, in the beginning there was supposedly "good" and "evil". The "good" polar condition was harmonious, nurturing, Love and fecundity. While the "evil" polar condition was inharmonious, murderous, fear and sterility. Our lives are riddled with polar conditions of Love and Fear, nice and bad, hot and cold, Master and Slave, poor and rich, etc. And the living of our lives is not much more than reconciling these polar conditions as best we can. This is what is meant by life being a duality - where there is always a polar condition and its polar opposite condition.

SVP Cosmology Part 3 - Polarity Manifests as Rotating Vortex

Dale Pond

3.1 - Law of Matter and Force
 "Coexistentive and coeternal with space and duration [time], there exists an infinite and unchangeable quantity of atomoles, the base of all matter; these are in a state of constant vibratory motion, infinite in extent, unchangeable in quantity, the initial of all forms of energy." Keely
 The formation of matter (defined and organized structure or form) is an autopoietic process in that each material structure is self-generating and perpetuating. Each unit is self-contained and occupies its own space and time. The idea of space and time limits (dimensions) was born from or with the split mind or dual (reflected, egoic) consciousness1 sometimes referred to as Newtonian [Analog] Physics. With the idea of limits comes the idea of space or a "place" where limits can exist. Any space must be defined (more limits). This definition must of necessity have dimension. At the time of the Void there is nothing in space but there is dimension or orientation of direction. There is a sense of direction of in and out (the fundamental basis of all vibratory and/or oscillatory motions1.1). Initially, two dimensions, directions, conditions or poles are established. This process is not linear in that dynamics do not occur sequentially. If there is established an in and out from a point there must be concurrently all three directions as shown in Figure 3.2 because an in and out motion is in all directions at once. However, using linear thinking helps to sort through complex issues.

The two initial states are 1) to separate, disperse or depolarized and 2) to be Unified, One or polarized; and are nothing more than tendencies or desires. The first tends in a direction directly away from the center/unity (entropic). The second tends to a direction towards the center/unity (centropic or negentropy). The two opposing tendencies cancel, neutralize or void each other's state or condition in certain octave and time relations. Since there are only two states they are initially in perfect equilibrium one against the other and that condition is said to be neutral - where is no motion or form/substance.

These two seemingly opposite states are what they are because of polarization. Polarization is evidenced in reciprocity of all characteristics including but not limited to: a) density/vacuity b) expansion/contraction c) motion/less motion etc. See Part 12

SVP Cosmology Part 6 - Formation of Cubes

Dale Pond

6.0 - Space seen as Constructive Cubes - Russell viewed the universe as an orthogonal matrix filled from end to end with constructive cubes wherein discrete motions of force and energy fulfilled the roles assigned them. These cubic spaces are defined by limits and dynamics of contained Forces and Energies. According to Russell these virtual cubes are defined by limits of dynamics and not defined by Space although occupying definable Space. On other words the Space Geometry of these Cubes is established and defined by contained dynamics or motions but not created and defined by the Cube geometries themselves. Sensorial man wishes to define by limits and things while nature defines by dynamics - something Reich would agree with.

"We shall no longer hang on to the tails of public opinion or to a non-existent authority on matters utterly unknown and strange. We shall gradually become experts ourselves in the mastery of the knowledge of the Future." ~Wilhelm Reich

"Reich's orgone is a spontaneously pulsatile, excitable, and negatively-entropic [syntropic] energy. It is an active, creative principle which is tangible, real, measurable, and in the "here and now". Through experiment, it was found that concentrated, excited orgone in high vacuum absorbs and diminishes electromagnetic excitations transmitted through it." [DeMeo, James; Response to Martin Gardner's Attack on Reich and Orgone Research in the Skeptical Inquirer]

SVP Cosmology Part 7A - Origin and Formation of Matter

Dale Pond

7.0 - What is Matter and Energy? - "Matter is the coagulation of sound." [A Dictionary of Musical Terms]

Schopenhauer writes: "The concept of Will has hitherto commonly been subordinated to that of Force, but I reverse the matter entirely and desire that every force in Nature be thought of as Will."

MacVicar writes: "Every individualized object assimilates itself to itself in successive moments of its existence and all objects tend to assimilate one another."

Keely states that were the inherent cohesive sympathy taken away from matter, the Universe would be promptly dissociated into the etheric realm.

"All conditions of dispersion and focalization are accompanied by the "celestial mind force" acting upon "terrestrial matter" - (corresponding to the mind force acting on the brain, which is only its molecular instrument.) This force is the first seal of the Book of Vibrational Philosophy - the first stepping stone toward solution of the Source of Life.

"All Nature's forces are mind forces: magnetic, electric, etheric, acoustic, solar. Any metallic mass can be so impregnated with certain vibrations that it will assume mental attributes - attraction and repulsion. We must first understand the triune conditions or laws of that sympathetic medium which interconnects matter with matter, the triune conditions or laws of sympathetic streams and unites resonance of each of the seven subdivisions before we can understand the induction by means of acoustic generators, of magnetic antagonisms in matter and the different forms of energy thereby liberated." SVP Cosmology Part 7B - Formation of Matter

Dale Pond

7B.02 - Three Forces in Harmony - The three spinning etheric envelopes will centralize and enclose one another. Each will possess a different velocity of rotation, direction of rotation and syntropic power of compression (sympathetic affinity) towards center. This results in six primary types of primal matter. See Part 14.

According to Russell's interpretation the aspects of each of these types of ray frequencies are accumulated to a maximum at the Center or 4++ of his octave wave. This is not entirely born out in others' works wherein these types of ray frequencies are maximized (respectively) at the beginning, center and end of the octave as per harmonic and overtone construction; i.e., as C, G and C', arithmetically speaking. There is an inherent sympathy between the notes of a scale else they would not work together forming harmonies. Degree of harmony (or sympathy) potential are taken to be 2 and powers of 2 of the scale's arithmetical structure. As overtones are formed other rate numbers not powers of 2 begin to appear and have influence. There are the secondary and tertiary harmonics. These would be 3, 5, 7, etc. being all discordant in varying degrees. See Part 11. Hence within the harmonic and discordant qualities of number we can see the working and differentiating actions of Keely's Law of Cycles.

"To know the mechanics of the wave is to know the entire secret of Nature." Walter Russell

NOTE: This presentation on vibration is in no way exhaustive. It is a work in progress with no scheduled date to be completed. It therefore does not (yet) cover all aspects known or theorized concerning the inner nature and dynamics of vibration, oscillation and wave phenomena.

See What Vibration Is. - Part 2.

8.1 - Conventional View of Vibration - That Keely, Russell and Tesla knew, understood and used basic natural laws and principles that we do not is a given. After more than twenty years of investigating their works it is obvious (to me at least) that one of many elements they understood one way and we another is the nature, structure and dynamics of vibration and oscillation (or "wave" as Russell termed it). All three of these men worked with the same theory of vibratory dynamics which is not the same as our conventional and accepted theory and view. With an understanding of their view of these dynamics much of their work becomes not only understandable but also reproducible. The mystery surrounding their work disappears and new possibilities open up for our own benefit, enjoyment and work.

See What Vibration Is. - Part 1.

9.1 - Propagation Function and Rates - Fill a given volume such as a swimming pool with cannon balls. Fill the space between the cannon balls with marbles. Pour sand into the volume filling in all remaining space between the cannon balls and marbles. There will be a point reached where no more sand can be added. Yet one could pour quite a bit of water into this volume filling the empty space between the grains of sand, marbles and cannon balls. Each of these substances represents a given frequency range or band of frequencies derived from particle diameter, substance and mass. Each of these ranges, chords or bands is discrete from the others. There would be a frequency band or chord for the cannon balls and a band or chord for each of the other substances. If the whole volume were put into vibration there would be a chord of vibrations emitting from this volume as a whole. This chord would be the chord of the mass of the volume. SVP refers to these different frequency bands as bands, chords, ranges, realms and dimensions. Each has it's own frequency range and hence propagation rate through it. Each vibration range or band would propagate through a contiguous media of it's own range at a different velocity from the other ranges. Taking Keely's repetitive use of Etheric, Atomic and Molecular ranges we can then see there are three distinct vibration ranges and concurrent propagation rates (depending on the vibrating mass, density and media of course).

SVP Universal Cosmology, version 2.3

Pond, Dale

Did you ever wonder what John Worrell Keely was really doing or how he did it? How about Walter Russell? What was he really saying in his comprehensive writings and beautiful artworks? So have I wondered. And this wondercaused me to set out 24 years ago (in 1984) to study their writings and what others wrote about them and sort it all out that we might to understand and eventually apply their vast knowledge to solutions for our time.

This product is the end result of all those years of study and deep thought. One person described this work as "massive". The CD contains over 900 pages of materials when printed out. The SVP Universal Cosmology is profusely illustrated with over 360 graphics, tables and images. All this and more to carefully sort through, review and explain what Keely, Russell, Cayce, Lewis and countless others had to say about a fresh new (for most of us) comprehensive paradigm that binds and bridges many fields of science, mathematics, music, philosophy, religion and art.

This product is in digital format because it will be more or less regularly updated from time to time. It is a work that perhaps may never be completed. Therefore when you purchase this product you will receive all the files and addenda available as of your purchase date. You will receive free updates of future material as it is updated for one year from purchase date. Thereafter a license to receive updates for one year may be purchased.

This product is delivered on CD post paid. There is no claim made as to the use, accuracy, veracity, intelligibility, useability or applicability of any information presented in the SVP Universal Cosmology materials. Purchase of this product includes lifetime subscription to the SVPwiki.

Sympathetic Streamings

Pond, Dale

In the ultimate analysis nothing exists except vibration. Vibration manifests as harmony or discord. Where there is harmony there is peace and positive progression. Where there is discord there is disruption and dis-ease. Harmony permeates the Universe as Sympathetic Streams between centers of force. When so united these individualized centers are *as one*, in love as it were, in their existences and associations. This pamphlet lays out the formative forces in their associations to build up the material universe. 8.5" X 11"

"The so-called "Oscillator" was near to a practical working form when the fire occurred, and as this machine, in a less finished shape, had been exhibited at the Chicago Exposition, and has received a large share of his attention since that time, he has considerably given the public some photographs and details of the more advanced forms of this engine. Tesla's researches and inventions have heretofore been confined to purely electrical problems, and electricians were naturally expecting a continuation of such work, but this inventor appears to delight in surprises, and when the Oscillator was announced for the first time, the general conclusion that Tesla had contrived some way of shaking the earth's electric charge, or had made some other ultra scientific step of a like character, was far from the truth."

The Coming Force of Love

Pond, Dale

"Love is a demonstrable force. It permeates the Universe. It is everywhere, all the time acting dynamically its role of harmonizer of discordant forces. It is a state of vibration which is to say an energy acting in a certain vibratory manner. This form or state of vibration is harmonic in that the various frequencies of its chordal make-up are harmonically related; i.e., by simple numbers and their multiples. This tight relationship educes a "coming together" or calming, gathering or centralizing effect. Any thing subjected to this vibration is caused to be calm, peaceful, together or in harmony. This is Love. It is not simply a human emotion restricted to humans alone as this effect can be witnessed in animals, plants, molecules and everywhere else. One could think of Love as that which holds things together in a harmonic (equilibrated) state. An analogy would be an orchestra composed of 100 musical instruments. As long as the tones played are in tune (harmonic to each other) the group can be together and play beautiful harmonies or concords."

The Five Loves - A Message from Mary to You - Accentuating Your Goodness & Putting It into Action

Stranges, Dawn

An excerpt from this pamphlet: "Dear Friends, it is my pleasure to address you here and now. I do so through the abilities of Dawn Stranges, an intuitive who has heard my message and been asked to pass it along. It is meant to give you hope and peace, and of course, greater Love.

There will continue to be increasing numbers and forms of interface (messages, etc.) between your world and ours, the Spiritual Realm. Please weigh them carefully, for all seek to give you a bigger picture of Truth. Some are pure and others may be tainted with fear. Our clear messages contain no fear, but Truth in its purity. Our underlying message is to understand and transmute Fear into Love. Messages which create fear defeat our intent to spread Love.

Please read the Five Loves with intent to incorporate their teachings into your life. Know that Loving the unLovable is the trick!

With Much Love, Mary, Mother of Jesus." 4" X 5.5" ISBN 0-9654447-2-4

The Keely Mystery

Sykes, Egerton

Egerton Sykes is credited with rediscovering and introducing John Keely in the 1960s. Sykes researched and wrote quite a bit about Keely and distributed that knowledge around the world via his several newsletters. This photocopy of the original pamphlet is the 2nd edition, 1972, of his original article written in 1964. It is well done and contains a number of hand drawn illustrations of Keely's devices.

The Message of the Divine Iliad, Volume I

Russell, Walter

The Message of the Divine Iliad express the heart and soul of Walter Russell's inspired philosophic cosmic thinking and knowing. He demonstrates that genius is inherent within everyone and that cosmic knowledge alone will make each person aware of his or her unique genius. Every person can become what he or she desires to be. Comprehension of universal law, the unity of all life, and the nature of communion with our Source will make it possible to attain any desired goal. To give that comprehension of the Cosmos is the purpose of The Message of the Divine Iliad. VOLUME I: Six books from The Message of the Divine Iliad: Part I: The Book of Desire; The Book of Rest; Who Am I?; Cosmic Messengers; Salutation to the Day; Invocation for the Night Part II: Ten Lectures by Walter Russell: Man's Purpose on Earth; The Law of Balance; The Meaning of Universal Oneness; Universality; Are We Really Alive?; Genius Inherent In Everyone; Think; Knowing Versus Sensing; The Secret of Creative Expression; and The Secret of Man's Power. The Universal One

Russell, Walter

A "must" for the serious student of Russell science and philosophy, The Universal One is Walter Russell's first expression of his new Cosmogony explaining the Mind-centered electromagnetic universe. Russell later revised some of the content of The Universal One in The Secret of Light and A New Concept of the Universe. Students of the Russell science should be aware of the historic sequence of Walter Russell's books of science, and note the various changes in details which Walter Russell himself made. Nikola Tesla told Walter Russell to hide his cosmogony from the world for a thousand years. Though a century or more ahead of its time, The Universal One, uniting spiritual Cause and scientifically observable Effect in a seamless whole, is now appealing to the many people—scientists and laymen alike—who are examining the nature of science and consciousness. In this 1926 historic volume, Walter Russell first reveals the possibility of transmutation of the elements. This is a universe of Mind, a finite universe, limited as to cause, and to the effect of cause. A finite universe, in which the effects of cause are limited, must also be limited as to cause; so when that measurable cause is known, then can man comprehend and measure all effects. The effects of cause are complex and mystify man, but cause itself is simple. The universe is a multiplicity of changing effects of but One unchanging cause. All things are universal. Nothing is which is not universal. Nothing is of itself alone. Man and Mind and all creating things are universal. No man can say: 'I alone am I.' There is but One universe, One Mind, One force, One substance. When man knows this in measurable exactness then will he have no limitations within those which are universal." — Walter Russell, from The Prelude to The Universal One. Part I: Creation; The Life Principle; Mind, The One Universal Substance; Thinking Mind; The Process of Thinking; Thinking Registered in Matter; Concerning Appearances; The Sex Principle; Sex Opposites of Light; The Reproductive Principle; Energy Transmission; A Finite Universe; A Dimensionless Universe; Concerning Dimension; The Formula of Locked Potentials; Universal Oneness; Omnipresence; Omnipotence; Omniscience. Part II: Dynamics of Mind & Light Units of Matter; Electricity and Magnetism; New Concepts of Electricity and Magnetism; Electricity; The Elements of Matter; The Octave Cycle of the Elements of Matter; The Instability and the Division of Stability.

THINK: Walter Russell IBM Lecture Series

Russell, Walter

Walter Russell (Edited by Laara Lindo and Yasuhiko Kimura)
THINK: Walter Russell IBM Lecture Series
 IBM Founder and President Thomas J. Watson and Walter Russell, who lectured for 12 years to IBM executives and employees, were pioneers in a visionary new concept of ethical business practice, exploring the use of unchanging, universal principles of balanced thinking and action that are as valid in the year 2000 as they were in the 1930's. Walter Russell speaks, in today's language, about the possibility that work can be an expression of one's genius and a path of self-fulfillment. He speaks about the unifying power of the global business industry for the creation of universal peace and prosperity on earth. While a learning organization requires a culture and system of continual development of outer knowledge and skills, which Russell calls resources, a character-building organization requires, in addition, a culture and system of continual development of inner self-knowledge and genius, which he calls resourcefulness. The organization's character is its destiny. The character of an organization is the integral of the character of its employees. **THINK: The First Principle of Business Success** is a mother lode of wisdom for the effective development of success for both the employer and employee, for the business consultant, the entrepreneur, and for every individual wanting to increase efficiency in managing his or her own business transactions, whatever they may be. 160 pages

Tone Building

Collingwood, Joseph

"MANY persons of good practical ability, moderately versed in the laws of acoustics, with an eye for form, and not deficient in a certain conception of art as art, and who had the instinct to work on lines, curves and thicknesses more or less true and best for producing fine tone, have "tried their hand" at violin-making and have seen their efforts cast aside, never to assume even mediocre rank in the stern array of modern violins, much less those of ancient Italy, merely because the wood selected was of an inferior, probably worthless, character, which would have been used to much better purpose had it been employed in the construction of a windmill or the shaft of a mine."

Well done presentation on tone principles of violin construction. The art used in designing and building high quality tone. The pamphlet describes what these principles of tone are and gives insight into how they may be achieved. A very rare and useful work. Copy of the original 1909 pamphlet. 8.5" X 11".

Using Ultrasonic Lamb Waves To Measure Moduli of Composites

Kautz, Harold E.

The investigation employs the acousto-ultrasonic configuration with broadband sending and receiving transducers for producing and detecting ultrasonic waves. With the acousto-ultrasonic methods it is possible to observe discrete pulses in the signal. The ultrasonic velocities of these pulses proved sensitive to variations in stiffness modulus and fiber/matrix interfacial shear strength in ceramic matrix composites. There is a need to clarify the nature of Lamb wave modes and to show how they can be used to assess material properties and boundary conditions. It is hoped to thereby demonstrate a method for monitoring mechanical properties of composites. NASA Tech Brief. 8.5" x 11"

Veil Withdrawn

Bloomfield-Moore, Clara Jessup

"True philosophy, when reached, said Professor George Bush, will conduct us into the realm of the spiritual as the true region of causes, and will disclose new and unthought of relations between the world of matter and of mind.

It is these unthought of relations which Keely's system of sympathetic physics brings to light; opening out a field for research which lies beyond the boundaries of our present knowledge. As yet he has been unable to satisfy his own penetrating mind in regard to all the hypothesis which his various discoveries have led him into formulating. He has himself, in his search for truth, pursued the wrong path too often, and made too many errors, not to welcome refutation of them, and acknowledge his mistakes when brought before him.

The title which he has given to the latent current of the triune polar flow that he discovered in 1872, "polar negative attraction," undoubtedly conveys the idea that this flow is an agent closely allied to magnetism; but such is not the case."

VHF Frequency Multiplier

Cussack, J. A.

The generation of a 361 MHz signal from a crystal oscillator was necessary for the first local oscillator injection for the Viking 1975 Orbiter Relay Radio Receiver. Alternative methods of generation of this 361 MHz signal include three active (transistor) doublers in cascade. However, this method normally requires higher current drain and, since it employs more components, particularly active components, is often not too reliable. Therefore, a step recovery diode, driven by a 45 MHz amplifier, was used for the X8 frequency multiplication. NASA Tech Brief. 8.5" x 11"

What Electricity Is. A Revelation of Forgotten Knowledge

Bloomfield-Moore, Clara Jessup

"Now that modern science has proclaimed, from her seat of learning (at the recent annual meeting of the British Association), that it knows nothing of "the great central mystery, the origin of life" - that "the stupendous problems, associated with the operation of the laws of nature," which the highest scientific intellects have been wrestling with for several generations, are still unsolved - that the questions, "Whence come we?" "Why are we here?" "Whither go we?" remain unanswered; and that if we strain our eyes to pierce the cloud of mystery which envelops these phenomena of nature, it is only to feel the conviction that it is impenetrable; that no certain knowledge can be obtained now that science thus admits her abject ignorance on all these subjects, could there be a more fitting time to make known to the world the fact that Keely's system of Sympathetic Vibratory Physics solves these problems, answers these questions, and demonstrates in mechanics what its canons assert?"

An indepth review of Keely's insights into electricity. It is not quite what orthodox science believes it to be. Electricity, magnetism and gravity form a triune whole. Manifested electricity is evidence of disturbed equilibrium of that whole. 8.5" X 11"
